Profile

Dedicated freelance programmer, shifted from being a PHP developer to become a fullstack JavaScript developer. More than 3 years of PHP experience and about 2 years of fullstack JavaScript experience. Skilled in ES6+ and Node and React (NextJS), eager to join your team to provide both frontend and backend solutions to your clients. Able to work in a team or as solo. In freelance world, proper handling of clients and delivering their products on time are the main keys, gradually learned those through the years.
